# South Dakota Alternate Academic Content and Achievement Standards

---

## Language Arts Introduction

Board Approved  
November 19, 2007

## Special Education Programs Mission Statement

Special Education Programs located in the South Dakota Department of Education advocates for the availability of the full range of personnel, programming, and placement options, including early intervention and transition services, required to assure that all individuals with disabilities are able to achieve maximum independence upon exiting from school.

---

## **Acknowledgements**

The South Dakota Alternate Academic Content and Achievement Standards for Language Arts are a result of the contributions of many educators from across the state. Many hours of collaboration were devoted to ensure the Alternate Standards would be appropriate for students of all ability levels. The Alternate Standards committee members represent the many concerned individuals across the state dedicated to their profession and to high quality standards for South Dakota students with disabilities. The Alternate Standards would not have been possible without their contributions. The South Dakota Department of Education wishes to express appreciation and gratitude to the individuals and the organizations they represent who contributed expertise and time to write the Alternate Standards.

### **South Dakota Alternate Academic Content and Achievement Standards Committee for Language Arts**

The South Dakota Department of Education acknowledges the leadership of the facilitators for their guidance in the development of this document:

- Tammi Haverly, Education Specialist, Childrens Care Hospital & School, Sioux Falls
- Mary Skinner, Special Education Teacher, Sioux Falls Public School District

Ann Blondheim, Elementary School Teacher, Holy Trinity Catholic School Huron  
Linda Clair, Elementary School Teacher, Stanley County School District  
Melissa Deckert, Middle School Teacher, Freeman School District  
Janet Evans, Elementary School Teacher, Lake Andes School District  
Cindy Froiland, Middle School Teacher, Parker School District  
Stephanie Hageman, Special Education Teacher, Lake Preston School District  
Nancy Heidenreich, High School Teacher, Faulkton Area School District  
Heather Hinnert, Special Education Teacher, Sioux Falls School District  
Christine Kosters, Special Education Teacher, Herreid School District  
Loretta LaPointe-Berenger, Special Education Teacher, Rapid City School District  
Steven Leber, Elementary School Teacher, Stanley County School District  
Peggy Mattke, Special Education Teacher, Meade School District  
Janell Millian, Elementary School Teacher, Wood School District  
Shirley Permann, High School Teacher, Gettysburg School District  
Michael Poper, Special Education Teacher, Douglas School District  
Beth Renner, Elementary School Teacher, Britton-Helca School District  
Lois Russell, Special Education Teacher, Stanley County School District  
Tracy Scott, Middle School Teacher, Agar-Blunt-Onida School District  
Maralee Shoup, Elementary School Teacher, Gettysburg School District  
Lynn Tribby, Special Education Teacher, Meade School District  
Barb Unruh, High School Teacher, Agar-Blunt-Onida School District  
Nancy Volk, Special Education Teacher, Sioux Falls School District

A special thank you to the South Dakota Department of Education staff involved in the writing of the Alternate Academic Content and Achievement Standards for Language Arts: Angie Boddicker, Shannon Schweitzer, Linda Turner and Jennifer Pogany (Intern).

The South Dakota Department of Education expresses special thanks to all of the individuals involved in the work of revising the standards.

To download the Alternate Standards, visit the SD Department of Education website at <http://doe.sd.gov/contentstandards/>  
For further information or questions concerning the Alternate Standards, contact the Special Education Programs at 605-773-3678.

## Overview of South Dakota Academic Standards

The South Dakota academic content standards provide a listing of essential core content to be taught and learned. The content and achievement standards are designed to guide the planning of instruction and to anchor the assessment of learning from kindergarten through twelfth grade. Performance descriptors bridge the content standards to assessments of the standards, provide information to teachers and students regarding student progress toward mastery of the standards, and give them specific targets for instruction and learning. The academic standards document presents a starting point for informed dialogue among those dedicated and committed to quality education in South Dakota. By providing a common set of goals and expectations for all students in all schools, this dialogue will be strengthened and enhanced.

All South Dakotans are eager to ensure that graduates of South Dakota's public schools have the knowledge, skills, and competencies essential to leading productive, fulfilling, and successful lives as they continue their education, enter the workforce, and assume their civic responsibilities.

The Standards Committee developed the current South Dakota Content Standards and Performance Descriptors utilizing input from students, parents, teachers, and South Dakota communities. Final documents evolved from: recent research in best practices, **No Child Left Behind** legislation, and classroom experience with existing South Dakota Content Standards, evolution of published standards from other states, numerous professional publications, and lengthy discussions by experienced K-16 South Dakota teachers.

### SOUTH DAKOTA ALTERNATE ACADEMIC STANDARDS OVERVIEW

South Dakota first established content standards for students with disabilities in 2000, meeting the requirements of IDEA. These Functional Standards were implemented during the 2000-01 school year and assessed using the state's alternate assessment. The Functional Standards were revised in the spring of 2004 to meet NCLB requirements and were renamed as Extended Standards. The South Dakota Board of Education (SDBOE) approved the Extended Standards for Reading and Mathematics in September 2004 and districts implemented them immediately during the 2004-05 school year. These standards were written broadly to encompass grades K-12 for both reading and math content standards.

As guidance and regulations became available concerning alternate academic achievement standards, SD DOE realized the need to establish the Reading and Mathematics Alternate Standards by grade level, linking them to grade-level content. The Extended Standards were revised during the winter of 2005 to establish Alternate Standards for each grade K through 12 for reading and for math at grades K-8 and at grade spans for grades 9-12. These standards were presented to the SDBOE for the first hearing in March 2005 as South Dakota Alternate Academic Content and Achievement Standards and were posted on the state's website and disseminated for public comment prior to the Board meeting in May. Revisions were made to

the draft document based upon recommendations from stake holders and the final version of the Reading and Mathematics Alternate Standards were presented to the SDBOE on May 17, 2005 and approved. Districts will implement these revised Alternate Standards during the 2005-2006 school year.

In July of 2005, another workgroup was established to write Alternate Standards for Science. Science Alternate Content standards are required to meet NCLB requirements to have an assessment system in place for Science by the school year 2007-2008. The initial draft of the Science Alternate Content Standards and Achievement Descriptors were presented to the SDBOE for the first hearing in November of 2005 and were posted on the state's website for public comment prior to the Public Hearing to the Board in January 2006.

Continuing the development of Alternate Content Standards to give students with the most significant disabilities access to the general education content, a workgroup was established to write the Alternate Standards for Social Studies in July/August 2006. The initial draft of the Social Studies Alternate Content Standards and Achievement Descriptors were presented to the SDBOE for the first hearing in November of 2006 and were posted on the state's website for public comment prior to the Public Hearing to the Board in March 2007.

During the 06-07 school year, the Language Arts general content standards were revised and approved by the Board of Education. In June 2007 a workgroup was established to revise the Alternate Standards for Reading and write the Alternate Standards for Writing and Speaking, Viewing, and Listening. The initial draft of the Language Arts Alternate Content Standards and Achievement Descriptors were presented to the SDBOE for the first hearing in September of 2007 and were posted on the state's website for public comment prior to the Public Hearing to the Board in November 2007.

The Department of Education selected a diverse group of educators to develop alternate standards and achievement (performance) descriptors for application to the education of students with significant cognitive disabilities. The workgroup, charged with the task of developing the Alternate Academic Content and Achievement Standards, used the South Dakota academic content standards as a reference document when developing the Alternate Content Standards. The goals and indicators come directly from the South Dakota content standards. The Alternate Academic Content and Achievement Standards are written for each grade ranging from Kindergarten to Grade 12 for language arts and at grades K-8 and at grade spans for grades 9-12 in math, science, and social studies.

When developing the Alternate Content Standards, the workgroup carefully divided the skills into four levels of complexity: advancing, applying, developing, and introducing. Each level of complexity was used as a guide and the student's age appropriate environment was considered. The categories range on a scale of more complex to less complex skills. Achievement descriptors are organized into performance levels. These levels describe how a student at that level would be expected to perform on the Alternate Content Standards.

Achievement descriptors and target skills were developed for each performance level and for each grade. Target skills developed in the context of grade level curriculum and serve as entry points to the Alternate Standards. These skills were developed to provide a tool for students to

work towards the alternate content standard and examples represent some possible activities or skills instructors could use in teaching the Alternate Content Standards. **Target skills and examples are not provided when the meaning of the Alternate Content Standard should be evident to the reader.** These entry points provide a range of options at which a student with a disability can access the learning standards. The skills found in the Alternate Content and Achievement Standards introduce students to challenging new ideas and content, promoting movement to grade level standards.

Training for educators will assure all children have access to the South Dakota content standards through the Alternate Academic Content and Achievement Standards. Educators will be trained in the correct use of target academic skills with emphasis on how the skills should be taught in the context of grade level curriculum. Educators will be trained to align South Dakota curriculum with the Alternate Academic Content and Achievement Standards and to incorporate them when developing Individual Education Plans (IEPs). Upon completion of training, participants will be able to describe the components of South Dakota's Alternate Academic Content and Achievement Standards and their relationship to the South Dakota content standards, incorporate the Alternate Standards into the IEP process, implement the Alternate Academic Content Standards through instruction, and understand the implementation requirements of the alternate assessment.

### ***What are the Alternate Content Standards?***

Many students with disabilities are able to work toward the content standard goals. However, the standards, as developed, do not appropriately address the educational needs of all students. Therefore, Alternate Content Standards have been developed to meet individual student needs.

The Alternate Content Standards expand the developmental spectrum of the South Dakota content standards. This allows all students the opportunity to access the general education curriculum.

The Alternate Content Standards are:

- ❖ a user-friendly guide in assisting with IEP development
- ❖ a progression of skills necessary for independent functioning (birth through age 21)
- ❖ academically based (presently in language arts and mathematics)
- ❖ based on (parallel) the state academic content standards

The South Dakota Academic Content Standards together with the Alternate Academic Content and Achievement Standards create a statewide system designed to support students, parents, teachers, and schools to uniformly promote high academic standards for all students in South Dakota.

### ***Who will use the Alternate Content Standards?***

The following are guidelines to assist the IEP team in determining which students will be instructed and assessed using the Alternate Academic Content and Achievement Standards.

- ❖ Even with modifications and accommodations, the general education standards are deemed inappropriate for the student's cognitive ability and adaptive skill levels.
- ❖ The student requires extensive direct instruction in multiple settings to apply and transfer skills.
- ❖ The student requires substantial adjustment to grade level content standards.

Students with disabilities must participate in the statewide assessment in order to measure their performance of content found in the State's Content Standards/Alternate Content Standards. This means students with disabilities that are working in the general academic content standards will take the **Dakota STEP** with or without accommodations. Students working in the Alternate Content Standards will take the alternate assessment, **Dakota STEP – A**.

### *How does the IEP team use the Alternate Content Standards?*

Once the IEP team determines which Alternate Content Standards are appropriate for a student, the team discusses the relationship of grade level standards to the Alternate Content Standards appropriate for the student:

- ❖ to determine the impact on curriculum and instruction
- ❖ to use Alternate Content Standards as a basis for the development of the individualized education plan

Educators will use the Alternate Content Standards document to align and develop instruction for students who will participate in the alternate assessment aligned to Alternate Achievement Standards, as determined by the IEP team. This document's Alternate Content Standards and target skills identify how and at what level of complexity students will address and attain learning standards. Educators can set realistic and challenging academic goals for individual students aligned with the general content standards. The Alternate Content Standards encourage teachers to reach for higher levels of achievement for their students.

As a reader becomes familiar with this document, they will discover the goal statements and indicators are retained from the South Dakota academic content standards. Alternate content standards are referenced by grade levels **for Kindergarten through Grade 12 for language arts and for grades K-8 and High School Core in math, science, and social studies, mirroring the design of the academic content standards**. Each alternate content standard is intended to capture the "essence" of the South Dakota general education content standards. Target skills under each alternate content standard provide "entry points" towards attaining the alternate content standard.

### ***“Entry Points” to the Alternate Content Standards***

Target skills can be viewed as entry points of student performance related to the Alternate Content Standards. These “entry points” provide a range of options at which a student with a disability can access the learning standard at a challenging level. These "entry points" are a tool to be used by educators and parents to identify instructional goals and objectives for the student. Target skills are listed under each Alternate Content Standard and represent what a student might do at that particular grade level.

**Target skills** are defined as higher level skills that enable students with disabilities to individually utilize the Alternate Content Standards in order to demonstrate a link to the South Dakota Content Standards.

- Using target skills in the context of academic instruction benefits students in the following ways:
- Allows students access to the general education standard
- Introduces students to challenging new ideas and content
- Provides new opportunities to practice skills in a variety of settings using a range of instructional approaches
- Achieves outcomes that exceed expectations

Target skills are aligned to the Alternate Content Standards. The Alternate Content Standards are aligned to the general education goals/strands and indicators. Target skills allow the student with a severe disability to gain access to the general curriculum.

An IEP team can use the target skills as examples when determining the skill a student needs to work on to progress towards the Alternate Content Standard. The target skill allows the student to work toward an alternate content standard that is the basis for the assessment of the student with a severe disability. This allows the student to gain access to the general curriculum.

*In other words, the IEP team can use the alternate content standard and the target skills, under each indicator to determine **where the student is at the beginning of the school term, where the student may reasonably be taken through instruction during the school term, and thus determines the assessment item for progress reporting and assessment reporting.***

## Alternate Academic Achievement Standards

Alternate content standards and achievement descriptors have been established for language arts, math, science and social studies. The Department of Education received approval by the State Board of Education throughout the process. Academic achievement standards consist of three components: achievement levels, achievement descriptors, and cut scores. Definitions of alternate achievement levels are expressed through the achievement descriptors. Cut scores for performance levels were established in the summer of 2007 for reading, math, and science. South Dakota teachers, facilitated by BUROS, participated in the standards setting procedure to provide teacher judgment.

### Achievement Levels

The State of South Dakota has defined four levels of student achievement for the Alternate Academic Achievement Standards: These levels are listed beside their corresponding performance level for grade level expectations.

**Advancing = Advanced**

**Applying = Proficient**

**Developing = Basic**

**Introducing = Below Basic**

### Achievement Descriptors (Performance Descriptors)

Alternate achievement descriptors describe each performance level and were written for each grade for each standard. These descriptors indicate how a student at that level would be expected to perform on the Alternate Content Standards. Frequency, setting, and level of support are factors that should be considered during instruction and assessment in order to discriminate increases in performance of skills at each level. **For the purpose of this document, support is defined as providing directed help or assistance through such means as encouragement, prompting, or by personally aiding the student to accomplish a task.**

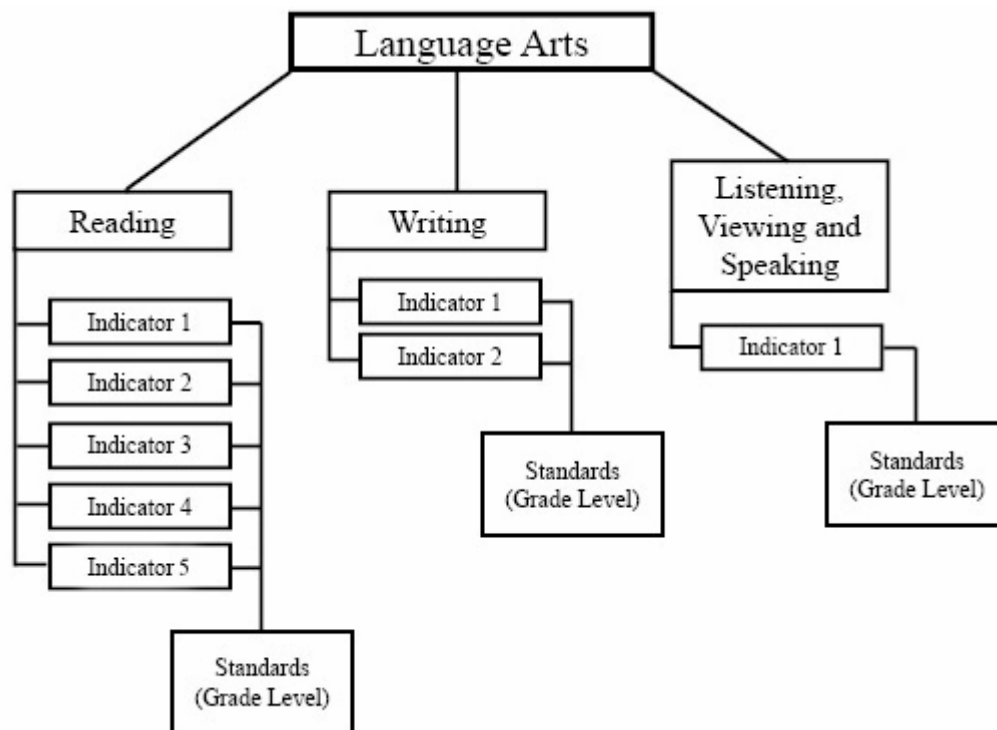

<b>Continuum of frequency, setting, and support.</b>	
<b>4</b>	Students demonstrate knowledge and skills consistently across multiple settings without support.
<b>3</b>	Students demonstrate knowledge and skills more than once in more than one setting without support.
<b>2</b>	Students demonstrate knowledge and skills once in one setting with minimal support.
<b>1</b>	Students attempt to demonstrate knowledge and skills once in one setting with support.

## South Dakota Language Arts Content Standards

The Language Arts Standards are set forth to ensure that graduates of South Dakota's schools have the knowledge, skills, and competencies essential to leading productive, fulfilling, and successful lives as they continue their education, enter the workforce, and assume their civic responsibilities.

With input from students, parents, teachers, and communities of South Dakota, the Language Arts Standards Committee was charged with revision of the current South Dakota Content Standards and Performance Descriptors. The final document evolved from recent research in best practices in teaching, the **No Child Left Behind** legislation, experience in classrooms with the existing South Dakota Content Standards, the evolution of published standards from other states, the National Assessment of Educational Progress (NAEP) Frameworks and descriptors, International Reading Association/National Council of Teachers of English standards for the English Language Arts, numerous professional publications, and lengthy discussions by experienced kindergarten through grade sixteen, South Dakota educators.

The content students need to acquire at each grade level is stated explicitly in these standards. With student mastery of this content, South Dakota schools will be competitive with the best educational systems in other states and nations. The standards are comprehensive and specific, they are rigorous, and they represent South Dakota's commitment to excellence. The standards are firm but not unyielding; they will be modified in future years to reflect new research and scholarship.

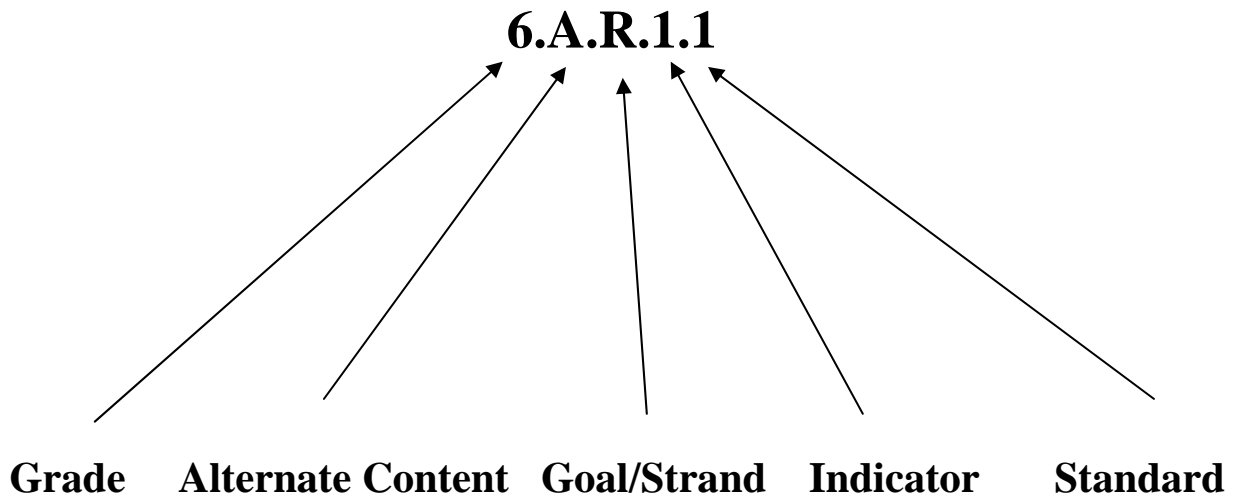

## ADDITIONAL RESOURCES

This document uses appropriate language arts terminology, so a reader may occasionally encounter an unfamiliar term. In order to assist the reader with terminology used in this document, a **glossary** has been written with specific definitions to clarify intended meaning.

A resource list is provided in the appendix as a sampling of possible information sources for teachers to use. Because new resources are constantly becoming available, this list is in no way intended to be an exhaustive or specified list of resources teachers are required to use. The reader is also cautioned that electronic media sites often change addresses. Use of a search engine is sometimes required to locate the resources when addresses change.

# Guide to the Numbering and Symbol System Used with the Alternate Language Arts Standards

Alternate Content Standards are coded to cross reference content, indicators, and standards.

**Grade** indicates the grade level.

**Alternate content** refers to the extension of the general content goals and indicators.

**Goal/Strand** refers to content area of the major areas of science.

**R** for Reading

**W** for Writing

**LVS** for Listening, Viewing and Speaking

**Indicator** refers to the general education indicator for each goal or strand. Each goal or strand has one or more related indicators that describe key aspects of the goal or strand.

**Standard** refers to number of the Alternate Content Standard for the indicator. (Example: A.R.1.1, A.R.1.2, A.R.1.3) Each alternate content standard describes what the students will know and be able to do. The standard is the essence of the general education grade level instruction and curriculum standards.
